> PROFILE

Hello! I'm Inês and I work as a frontend developer.

I am coding for tech companies for over eight years now. From startups to big companies, I've experienced different kinds of environments. All of them enriched my career and also enriched me as a person.

I always had a strong passion for design, so being equipped with solid technical skills and a keen eye for aesthetics, I strive to create visually appealing and user-friendly web experiences.

LetsGetChecked

Mar 2024 - Nov 2025

Worked on the development and maintenance of internal applications at a health-tech company providing at-home laboratory testing. Contributed to tools used for customer management, as well as test kit registration and tracking.
Collaborated closely with cross-functional teams using Jira for task management, including implementing features, testing work from other developers, and ensuring overall application quality. Also participated in internal knowledge-sharing initiatives, leading sessions to promote best practices and team alignment.

- Development and maintenance of internal web applications supporting business and operational workflows.

- Implementation of new features and bug fixing across frontend-focused solutions.

- Task management and collaboration using Jira within Agile and Kanban methodologies.

- Testing of application flows and features developed by other engineers to ensure quality and reliability.

- Contribution to peer reviews and internal knowledge-sharing initiatives.

- Testing of application features using Jest (Angular)
